C9 Chemistry of the Atmosphere – Knowledge Organiser: Self-Test

AQA GCSE Chemistry • Set 1: The Atmosphere Then and Now **Paper 2**

#	Question	Attempt 1	Attempt 2	Attempt 3	Answer
1	Nitrogen in today's atmosphere				About 80%
2	Oxygen in today's atmosphere				About 20%
3	Other gases in small amounts				Carbon dioxide, water vapour, noble gases
4	Source of the early atmosphere				Volcanoes
5	Main gas in the early atmosphere				Carbon dioxide
6	How the oceans formed				Water vapour condensed
7	How CO_2 decreased				Dissolved in oceans; photosynthesis; locked in rocks and fossil fuels
8	Where oxygen came from				Photosynthesis by algae and plants
9	Photosynthesis equation				$6CO_2 + 6H_2O \rightarrow C_6H_{12}O_6 + 6O_2$
10	When the atmosphere became like today's				About 200 million years ago

Fold the Answer column behind the page. Answer each question from memory, then unfold and check. Repeat on a later day in the next Attempt column.

C9 Chemistry of the Atmosphere – Knowledge Organiser: Self-Test

AQA GCSE Chemistry • Set 2: Greenhouse Gases and Climate Change **Paper 2**

#	Question	Attempt 1	Attempt 2	Attempt 3	Answer
1	Main greenhouse gases				Carbon dioxide, methane, water vapour
2	How greenhouse gases warm the Earth				Absorb infrared radiation from the Earth
3	Human sources of carbon dioxide				Burning fossil fuels, deforestation
4	Human sources of methane				Livestock, landfill, rice fields
5	Effects of climate change				Rising sea levels, extreme weather, habitat change
6	Carbon footprint				Total greenhouse gases emitted over a product's life
7	Ways to reduce carbon footprint				Renewable energy, efficiency, carbon capture
8	Why climate predictions are uncertain				Complex systems; simplified models
9	Limestone formed from				Shells and skeletons of sea creatures
10	Crude oil and natural gas formed from				Plankton buried in mud

Fold the Answer column behind the page. Answer each question from memory, then unfold and check. Repeat on a later day in the next Attempt column.

C9 Chemistry of the Atmosphere – Knowledge Organiser: Self-Test

AQA GCSE Chemistry • Set 3: Atmospheric Pollutants **Paper 2**

#	Question	Attempt 1	Attempt 2	Attempt 3	Answer
1	Source of carbon monoxide				Incomplete combustion
2	Why carbon monoxide is dangerous				Toxic, colourless and odourless
3	Source of sulfur dioxide				Sulfur impurities in fuels
4	Source of oxides of nitrogen				Nitrogen + oxygen at high temperature in engines
5	Problems caused by SO_2 and NO_x				Acid rain, breathing problems
6	Particulates				Solid carbon (soot) and unburnt hydrocarbons
7	Problems caused by particulates				Global dimming, lung damage
8	Global dimming				Less sunlight reaching the Earth's surface
9	Why the early atmosphere is uncertain				Little evidence from 4.6 billion years ago
10	Coal formed from				Plant deposits

Fold the Answer column behind the page. Answer each question from memory, then unfold and check. Repeat on a later day in the next Attempt column.
