RP5 Rates of Reaction – Knowledge Organiser: Self-Test

AQA GCSE Chemistry • Set 1: Rates of Reaction **Paper 2**

#	Question	Attempt 1	Attempt 2	Attempt 3	Answer
1	Method 1				Measure volume of gas produced
2	Method 2				Time for a cross to disappear
3	Reaction used for gas volume				Magnesium + hydrochloric acid
4	Reaction used for the disappearing cross				Sodium thiosulfate + hydrochloric acid
5	Independent variable				Concentration of acid
6	Dependent variable				Volume of gas, or time for cross to disappear
7	Control variables				Temperature, volumes, mass of magnesium
8	Apparatus to collect gas				Gas syringe or upturned measuring cylinder
9	Why the same person watches the cross				Same judgement each time
10	Hazard				Sulfur dioxide; ventilate the room

Fold the Answer column behind the page. Answer each question from memory, then unfold and check. Repeat on a later day in the next Attempt column.
