RP8 Water Purification – Knowledge Organiser

AQA GCSE Chemistry • Set 1: Water Purification **Paper 2**

#	Question	Answer
1	How pH is measured	Universal indicator or pH meter
2	How dissolved solids are measured	Evaporate and weigh the residue
3	Method to purify water	Distillation
4	Water flow in the condenser	In at bottom, out at top
5	Why the condenser is cooled	Condenses the steam
6	Boiling point of pure water	100 °C
7	pH of pure water	7
8	Residue from evaporating pure water	None
9	Why heat gently	Avoid boiling over
10	Example sample to purify	Salt water
