RP8 Water Purification – Knowledge Organiser: Self-Test

AQA GCSE Chemistry • Set 1: Water Purification **Paper 2**

#	Question	Attempt 1	Attempt 2	Attempt 3	Answer
1	How pH is measured				Universal indicator or pH meter
2	How dissolved solids are measured				Evaporate and weigh the residue
3	Method to purify water				Distillation
4	Water flow in the condenser				In at bottom, out at top
5	Why the condenser is cooled				Condenses the steam
6	Boiling point of pure water				100 °C
7	pH of pure water				7
8	Residue from evaporating pure water				None
9	Why heat gently				Avoid boiling over
10	Example sample to purify				Salt water

Fold the Answer column behind the page. Answer each question from memory, then unfold and check. Repeat on a later day in the next Attempt column.
