C14 Alkenes – Knowledge Organiser: Self-Test

AQA A-level Chemistry • Set 1: Structure and Electrophilic Addition **Paper 2**

#	Question	Attempt 1	Attempt 2	Attempt 3	Answer
1	Alkene functional group				C=C
2	Bonds making up a C=C				One σ bond and one π bond
3	Why alkenes are reactive				High electron density in the C=C
4	Electrophile				Electron pair acceptor
5	Type of reaction of alkenes with HBr or Br_2				Electrophilic addition
6	Test for an alkene				Bromine water
7	Positive result for an alkene				Orange to colourless
8	Product of ethene with HBr				Bromoethane
9	Product of ethene with Br_2				1,2-dibromoethane
10	Product of ethene with steam (H_3PO_4)				Ethanol

Fold the Answer column behind the page. Answer each question from memory, then unfold and check. Repeat on a later day in the next Attempt column.

C14 Alkenes – Knowledge Organiser: Self-Test

AQA A-level Chemistry • Set 2: Carbocations and Polymers **Paper 2**

#	Question	Attempt 1	Attempt 2	Attempt 3	Answer
1	Order of carbocation stability				Tertiary > secondary > primary
2	Major product of propene with HBr				2-bromopropane
3	Minor product of propene with HBr				1-bromopropane
4	Reagent that adds to alkenes to form an alkyl hydrogensulfate				Conc H_2SO_4
5	Polymer formed from ethene				Poly(ethene)
6	Repeating unit of poly(propene)				$-CH_2-CH(CH_3)-$
7	Monomer of PVC				Chloroethene
8	Why addition polymers are unreactive				Saturated; strong non-polar bonds
9	Effect of a plasticiser on PVC				Makes it flexible
10	Type of polymerisation of alkenes				Addition

Fold the Answer column behind the page. Answer each question from memory, then unfold and check. Repeat on a later day in the next Attempt column.
