RP12 Thin-Layer Chromatography – Knowledge Organiser: Self-Test

AQA A-level Chemistry • Set 1: Thin-Layer Chromatography **Paper 2**

#	Question	Attempt 1	Attempt 2	Attempt 3	Answer
1	Stationary phase				Silica or alumina on a plate
2	Baseline drawn in				Pencil
3	Solvent level relative to baseline				Below
4	Why spots are small and concentrated				Give clear, separate spots
5	Why the plate is held by the edges				Avoid contamination
6	Why a lid is used				Saturates the atmosphere with solvent
7	When the plate is removed				Solvent near the top
8	What is marked on removal				Solvent front
9	R_f equation				Distance moved by spot ÷ distance moved by solvent
10	How a component is identified				Compare R_f with a known sample

Fold the Answer column behind the page. Answer each question from memory, then unfold and check. Repeat on a later day in the next Attempt column.
