RP2 Measuring an Enthalpy Change – Knowledge Organiser: Self-Test

AQA A-level Chemistry • Set 1: Measuring an Enthalpy Change **Papers 1 & 2**

#	Question	Attempt 1	Attempt 2	Attempt 3	Answer
1	Container used				Polystyrene cup with lid
2	Why polystyrene is used				Good insulator
3	Why a lid is used				Reduces heat loss
4	Why the mixture is stirred				Even temperature throughout
5	Why temperature is recorded before mixing				Gives a steady starting temperature
6	Why a temperature–time graph is extrapolated				Corrects for heat loss
7	Time the graph is extrapolated to				Time of mixing
8	Specific heat capacity assumed for the solution				4.18 J g^{-1} K^{-1}
9	Density assumed for the solution				1 g cm^{-3}
10	Why one reactant is in excess				Ensures the other reacts completely

Fold the Answer column behind the page. Answer each question from memory, then unfold and check. Repeat on a later day in the next Attempt column.
