RP7 Measuring Rate of Reaction – Knowledge Organiser: Self-Test

AQA A-level Chemistry • Set 1: Measuring Rate of Reaction **Paper 2**

#	Question	Attempt 1	Attempt 2	Attempt 3	Answer
1	Indicator in an iodine clock				Starch
2	Colour at the clock point				Blue-black
3	Role of thiosulfate in an iodine clock				Removes I_2 until used up
4	Initial rate is proportional to				$1/t$
5	Variable changed in the initial rate method				Concentration of one reactant
6	Why total volume is kept constant				Concentration ∝ volume of reactant
7	Three continuous monitoring methods				Gas volume, mass loss, colorimetry
8	Apparatus to measure gas volume				Gas syringe
9	Why a cotton wool plug is used for mass loss				Lets gas out but not liquid
10	Rate from a continuous monitoring graph				Gradient of tangent

Fold the Answer column behind the page. Answer each question from memory, then unfold and check. Repeat on a later day in the next Attempt column.
