RP8 Electrochemical Cells – Knowledge Organiser

AQA A-level Chemistry • Set 1: Electrochemical Cells **Paper 1**

#	Question	Answer
1	Salt bridge	Filter paper soaked in saturated KNO_3
2	Instrument used	High-resistance voltmeter
3	Why high resistance	No current flows, so maximum EMF
4	How metal electrodes are cleaned	Emery paper
5	Concentration of solutions	1.00 mol dm^{-3}
6	Temperature	298 K
7	Why a new salt bridge is used each time	Avoid contamination
8	Electrode for Fe^{3+}/Fe^{2+}	Platinum
9	$E^{\ominus}$ of Cu^{2+}/Cu	+0.34 V
10	$E^{\ominus}$ of Zn^{2+}/Zn	−0.76 V
