RP8 Electrochemical Cells – Knowledge Organiser: Self-Test

AQA A-level Chemistry • Set 1: Electrochemical Cells **Paper 1**

#	Question	Attempt 1	Attempt 2	Attempt 3	Answer
1	Salt bridge				Filter paper soaked in saturated KNO_3
2	Instrument used				High-resistance voltmeter
3	Why high resistance				No current flows, so maximum EMF
4	How metal electrodes are cleaned				Emery paper
5	Concentration of solutions				1.00 mol dm^{-3}
6	Temperature				298 K
7	Why a new salt bridge is used each time				Avoid contamination
8	Electrode for Fe^{3+}/Fe^{2+}				Platinum
9	$E^{\ominus}$ of Cu^{2+}/Cu				+0.34 V
10	$E^{\ominus}$ of Zn^{2+}/Zn				−0.76 V

Fold the Answer column behind the page. Answer each question from memory, then unfold and check. Repeat on a later day in the next Attempt column.
